Fathima Khanam

SAP BTP Developer | CAP Java & Node.js | ABAP | Fiori / UI5 | S/4HANA Cloud | OData V4
Email: fathimakhanam0014@gmail.com
Phone: +91-6302566651 | Location: Hyderabad, India |
LinkedIn: https://www.linkedin.com/in/fathimakhanam/ | GitHub: https://github.com/FathimaKhanam |
Portfolio: https://fathimakhanam.github.io/Protfolio/ |
Open to Relocation: UAE / GCC | Notice Period: 60 Days
Available for Interview at Short Notice

Professional Summary

SAP Technical Developer and Consultant with **3.5+ years** of enterprise delivery spanning traditional ABAP and modern **SAP BTP**, currently embedded at **SAP Labs India** (via Ennobel UK) delivering production-grade **CAP (Java & Node.js)** services, **OData V4** APIs, and **Fiori Elements** frontends on BTP Cloud Foundry. Dual **SAP Certified Associate** in CAP Backend Development and S/4HANA Cloud Implementation. Deep prior delivery across **S/4HANA greenfield implementations and rollouts** at Capgemini and Argano, spanning MM, SD, PP, OTC, PTP, QM, and FTM modules. Additionally designing and delivering a **25-session SAP ABAP-to-BTP transition course** published via GitHub, YouTube, and Udemy. Consistently delivers clean-core extension architecture, rapid production incident resolution, and cross-functional stakeholder collaboration across enterprise SAP landscapes.

Certifications & Credentials

- **SAP Certified Associate** — Backend Developer, SAP Cloud Application Programming Model (CAP) *Dec 2025*
- **SAP Certified Associate** — Implementation Consultant, SAP S/4HANA Cloud Public Edition *Dec 2025*

Additional certifications available on https://www.credly.com/users/fathima-khanam/badges#credly.

Technical Competencies

SAP BTP Stack	SAP CAP (Java & Node.js), CDS Modelling, OData V4, SAP HANA Cloud, BTP Cloud Foundry, SAP Build, Multi-Target Application (MTA), cf CLI, Service Manager, Destination Service, XSUAA, BTP Cockpit
Frontend / UI	Fiori Elements, SAP UI5, Fiori Launchpad, CDS Annotations, TypeScript, XML Fragments, Controller Extensions, WCAG / ARIA Accessibility, JAWS / NVDA Screen Reader Compliance
Core ABAP & S/4HANA	RICEF Objects, OData Services (SEGW), Module Pool, Web Dynpro, ALV Reporting, SmartForms, Adobe Forms, CDS Views, AMDP, ATC, LTMC Data Migration, RAP (RESTful ABAP Programming), Clean Core, SAP Activate Methodology, Fit-to-Standard
Integration Architecture	RFC, BAPI, IDoc, ALE, EDI, BDC (Call Transaction & Session), ABAP Proxies, REST APIs, SOAP Web Services, Event Mesh, SAP Integration Suite (conceptual)
Enhancements	BAdIs, User Exits, Enhancement Spots, Implicit / Explicit Enhancements, Side-by-Side Extensibility, Clean Core Extensions
SAP Functional Modules	MM, SD, PP, QM, FI, OTC (Order-to-Cash), PTP (Procure-to-Pay), FTM (Financial Treasury)
DevOps & Tooling	Git (cherry-pick, rebase, selective staging), CI/CD Pipelines, Agile / Scrum, Eclipse ADT, SAP Business Application Studio (BAS), VS Code, PostgreSQL, SQL Optimisation, Unit Testing, AsciiDoc

Professional Experience

SAP BTP Developer *Mar 2026 – Present*

SAP Labs India (via Ennobel UK) Hybrid / Remote • SAP Fiori Apps Library Team • CAP Java & Node.js • BTP Cloud Foundry • Fiori Elements • HANA Cloud

- Developed and maintained production **CAP (Java & Node.js)** backend services on **BTP Cloud Foundry**; implemented CDS entity modelling, custom service handlers, and HANA Cloud persistence for an enterprise-scale Fiori app catalogue product serving 50,000+ SAP ecosystem users.
- Designed and exposed **OData V4** services with action bindings and annotation-driven behaviour consumed by **Fiori Elements** frontends, supporting 50+ application entries in the SAP product catalogue.
- **Production Incident Resolution:** Investigated and resolved a critical data defect where a junction table remained empty after bulk data ingestion; identified the root cause as a missing composite key computation in the CAP service handler; fix merged to the main branch with full CI pipeline pass and deployed to production within 2 working

days, restoring data integrity for the release cycle.

- **Production Incident Resolution:** Diagnosed a Controller Hook data gap in the Fiori Extensibility panel; traced the defect across the frontend formatter layer, XML fragment view, and TypeScript helper module; delivered the fix via a pull request reviewed and approved by senior engineers, preventing a defect from reaching the next product release.
- Designed and documented a self-referential **junction entity** data model specification covering cardinality, relationship modelling, and navigation associations; iterated through 3 rounds of technical reviewer feedback, contributing directly to the architectural sign-off for a new BOM data feature.
- Resolved **7+ WCAG / ARIA accessibility incidents** across 3 Fiori frontend components (JAWS and NVDA screen reader compliance); fix patterns included correcting landmark roles, adding ariaLabelledBy bindings to tables and dialogs, and restructuring DOM traversal order — achieving full accessibility compliance for affected components ahead of the release deadline.
- Maintained a suite of **135+ unit tests** with 0 regression failures across 3 production releases; upheld Git branch hygiene across multiple production branches using cherry-pick, rebase, and selective staging.

SAP ABAP Developer *Dec 2024 – Feb 2026*

Argano Hyderabad, India • Remote S/4HANA Implementation Projects • SD, MM, PP Modules • North American Industrial and HVAC Manufacturing Clients

- Delivered a complete **RICEF** object suite across SD, MM, and PP modules on two parallel **S/4HANA greenfield implementations** following SAP Activate Methodology and Fit-to-Standard workshop outputs.
- Implemented **CDS Views** and **AMDP** procedures for real-time operational analytics, reducing report execution time by ~40% over classical ABAP on HANA.
- Executed **LTMC**-based data migration for 50,000+ material master records with high data-quality accuracy, eliminating manual data-entry intervention and reducing go-live data preparation effort by ~3 weeks.
- Enhanced standard transactions (VA01/VA02, ME51/ME52) via **BAdIs** and **User Exits** to implement client-specific procurement and order-management validations, eliminating 100% of previously manual checking steps.
- Implemented **SAP Workflow** for multi-level approval processes, reducing approval cycle time from 5 days to 8 hours — a 93% reduction.
- Developed **Module Pool** programs and RF screen applications for warehouse operations; performed **ATC** checks and HANA code remediation.

SAP ABAP Developer *Dec 2022 – Dec 2024*

Capgemini Bengaluru, India • ERP Consolidation — S/4HANA Implementation • OTC, PTP, QM, FTM Modules • Global Defence and Aerospace Manufacturer

- Contributed to ABAP development consolidating 3 legacy ERP systems into a single **S/4HANA** landscape; delivered a full **RICEF** suite across OTC, PTP, QM, and FTM modules under SAP Activate Methodology.
- Engineered inbound/outbound interfaces via **BDC**, **RFC**, and **BAPI** for third-party system integration, processing 100,000+ daily transactions reliably across the production landscape.
- Designed and deployed **SmartForms** and **Adobe Forms** for procurement output documents, reducing manual processing effort by ~60%.
- Delivered performance tuning through secondary indexes, database buffering, and **SQL optimisation**, reducing critical report execution time by over 50% and eliminating 2 recurring timeout incidents per month.
- Built a structured error-handling and logging framework for mission-critical interfaces, reducing production incidents by 35% within 6 months of deployment.
- Collaborated with SD functional consultants to translate business requirements into technical ABAP specifications; mentored 3 junior developers on ABAP best practices and S/4HANA migration strategies.
- **Leadership:** Vice President of Education, Capgemini Toastmasters Club — led structured communication coaching for 30+ members across 12 months.

SAP Training & Technical Content Creation

SAP ABAP on BTP — Trainer & Technical Content Creator *2026 – Present*

Independent GitHub • YouTube • Udemy • Remote • https://www.showay.in/

- Designing and delivering a **25-session SAP ABAP on BTP training programme** for experienced ABAP developers transitioning to the SAP BTP stack — covering CAP (Java & Node.js), CDS Modelling, OData V4, Fiori Elements, SAP Build, BTP Cloud Foundry, Git workflows, and cloud deployment strategies.
- Publishing hands-on exercises and architecture walkthroughs through GitHub repositories (published repos include student-cap-app-vscode and cap-s4-extension-demo), YouTube tutorials, and a Udemy course module.
- Mentoring developers on clean-core extension architecture, side-by-side extensibility, and SAP Activate-aligned development workflows; demonstrating architectural decision-making across BTP services.

Portfolio Projects

Smart Vendor & Procurement Management — SAP BTP Side-by-Side Extension *2024 – 2025*

Stack: SAP CAP • Node.js • CDS • OData V4 • REST APIs • PostgreSQL • S/4HANA APIs • BTP Cloud Foundry • XSUAA

- Architected a **Clean Core** SAP BTP side-by-side extension for non-intrusive S/4HANA vendor management; implemented bi-directional S/4HANA integration via RFC/BAPI for real-time master data synchronisation across 500+ vendor records.
- Engineered **OData V4** and REST services with SAP CAP (Node.js) and PostgreSQL; built a custom validation framework reducing invalid data submissions by ~90%; delivered real-time analytics dashboards and multi-level approval workflows.

S/4HANA Side-by-Side Extension — Business Partner Integration *2025*

Stack: SAP CAP • Node.js • OData V4 • SQLite / PostgreSQL • REST APIs • CDS • SAP BTP

github.com/FathimaKhanam/cap-s4-extension-demo

- Built a **Clean Core** compliant CAP (Node.js) extension receiving and persisting Business Partner master data from S/4HANA; implemented intelligent upsert logic, a custom validation framework, and full error handling covering 15+ test scenarios.
- Exposed **OData V4** service endpoints with filtering, sorting, pagination, and $count support; includes a comprehensive HTTP test suite demonstrating 15+ query patterns for downstream Fiori and API consumers.
- Related training exercise with a documented step-by-step learning guide available at github.com/FathimaKhanam/student-cap-app-vscode — part of the SAP ABAP on BTP training programme.

Education

M.Tech — Computer Science & Engineering *Sep 2025 – May 2027*

KL University, Guntur, India

B.Tech — Computer Science & Engineering *June 2019 – June 2022*

PSCMR College of Engineering and Technology (JNTUK-affiliated), Vijayawada, India • *Research Publication: IJIEMR–Elsevier SSRN*

Diploma — Computer Science & Engineering *2016 – 2019*

KES Girls College, Krishna University-affiliated, Vijayawada, India

Additional Information

Languages	English (Full Professional) • Telugu (Native) • Urdu (Native) • Hindi (Full Professional) • Arabic (Learning)
Availability	Open to Relocation: UAE / GCC • Notice Period: 60 Days • Available for technical interviews at short notice
Visa Status	Indian National — eligible for UAE / GCC employment visa and work permit sponsorship
Other	Research Publication: IJIEMR–Elsevier SSRN • Toastmasters VP of Education (Capgemini Chapter)
